ABOUT US

Pomili Demolizioni Speciali Srl has been a leading company in the Environmental and Automotive sectors for over 40 years. Thanks to highly qualified operators, technicians and specialised workers, the Company is at the forefront of operational procedures and technologies. The Company is headquartered in Monterotondo (Metropolitan Area of Roma Capitale) and has inaugurated a second operational site in the industrial area of Rieti-Cittaducale in 2023.

Pomili Demolizioni Speciali Srl is constantly updated based on market needs and newly issued sectoral regulations. Moreover, it holds the highest qualifications in environmental, organisational, and management engineering skills.

The Company adopts the Integrated Management System according to international standards UNI EN ISO 9001, ISO 14001, ISO 45001. It also obtained the SA 8000 and UNI PDR 125-2022 certifications.

In their special editions "La Repubblica A&F", "Quality & Markets" section of November 1, 2021, November 7, 2022, and November 13, 2023, the German ITQF Institute and La Repubblica A&F (Affari & Finanza) published a study on Italian businesses (Micro, small and medium-sized enterprises), ranking **Pomili Demolizioni Speciali Srl** among the Italian 'Growth Champions', namely enterprises with the most remarkable economic development, for three years in a row (2021-2022-2023). This recognition results from the work carried out by the Automotive and Environmental departments from a circular economy perspective.

CERTIFICATIONS AND ENROLMENTS

Thanks to procedure and service optimisation, **Pomili Demolizioni Speciali Srl** holds the following certificates of conformity:

- CERT-14541-2004-AQ-ROM-SINCERT (Quality);
- 279893-2018-AHSO-ITA-ACCREDIA (Environment);
- 279893-2018-AHSO-ITA-ACCREDIA (Occupational Safety);
- 10000516583-MSC-SAAS-ITA (Ethics and Social Accountability);
- C632004 (Gender Equality).

The Company is enrolled in the National Register of Environmental Managers (Albo Nazionale Gestori Ambientali) in categories/classes 1D, 4D, 5C, 8F, 9D, 10B-C. Moreover, it is a member of PolieCo - National Consortium for the Recycling of Polyethylene Waste.

AUTHORISED TREATMENT FACILITIES (ATFs)

Pomili Demolizioni Speciali Srl, with headquarters in Monterotondo (Rome) and a further treatment facility in Cittaducale (Rieti), is a modern Industrial Car and Motorcycle wrecking facility. As an ELV (End-of-Life Vehicles) collection and processing centre and a member of CAR-Confederazione Autodemolitori Riuniti (Confederation of United Car Wreckers), the Company is also an authorised PRA (Italian Vehicle Registration Agency) platform for cancellation procedures.

The Company fully complies with ELV conferment, demolition, and radiation requirements (including those provided in the ELV-U.N.R.A.E. project National Union of Foreign Vehicles). Since January 2018, it has obtained the AVEI (Electric or Hybrid Vehicle Wrecking) qualification for properly managing electric or hybrid ELVs.

Pomili Demolizioni Speciali Srl is the Authorised Treatment Facility of the leading Automotive Brands and Car Manufacturers. Manufacturers, such as PSA and Stellantis.

ELECTRIC AND HYBRID VEHICLE WRECKING FACILITY

In January 2018, **Pomili Demolizioni Speciali Srl** obtained the AVEI (Electric or Hybrid Vehicle Wrecking) qualification, guaranteeing the Company's expertise and skills for managing electric or hybrid ELVs. The acquisition of innovative expertise and competencies in the wrecking of electric and hybrid vehicles ensures the provision of specialised and competitive services to Automotive Brands. To achieve this qualification, **Pomili Demolizioni Speciali Srl** underwent a third-party audit assessing its ability to meet technical, operational, management and training requirements.

The AVEI certification enables the Company to:

- Assure Automotive Brands on the correct collection, treatment and re-use of electric and hybrid vehicles by referring to their technical documentation for operations to be performed on crashed vehicles and providing information on components, materials and hazardous substances;
- Ensure a complete and professional service to its customers by keeping pace with system and component innovations resulting from the different technologies on the market and related to electric and hybrid vehicles.

With its long-standing experience in this sector, **Pomili Demolizioni Speciali Srl's** technicians recover and restore HV components and batteries from electric and/or hybrid vehicles, aided by specific PES/PAV (Skilled/Instructed Persons) and the PEI (Qualified person to electrical works under voltage) and supported by advanced and continuous training on the treatment of electrical and/or hybrid vehicles' components.

The AVEI qualification and ISO certifications ensure compliance with environmental regulations, CEI 11-27 regulation and the obligations provided under Legislative Decree 81/08 on Occupational Health and Safety, and the Best Practices defined by the leading Car Manufacturers.

GEA CARONTE 24 PROJECT

With the GEA (Environmental and Car Wrecking Services Management) project, designed by **Pomili Demolizioni Speciali Srl** in reply to the "Digital Impresa Lazio" Public Call for Tender, the Company-helped by Giunko Srl's innovation experts- implemented the 'CARonte24' service, a project co-financed by the European Union through the contribution of the Lazio Region under the POR FESR 2014 - 2020.

By accessing the web portal Caronte24.com, users can autonomously:

- request the collection of a vehicle;
- monitor the booking status;
- download the scrapping documents.

CARonte24.com

SCRAP YOUR VEHICLE FROM HOME IN 2 CLICKS

Request the collection of your vehicle at home!

Available 24/7!

Caronte24.com is a tool available to individuals, businesses and public entities.

Car Dealership - Caronte24.com is a platform that supports professionals by streamlining the management of vehicle pick-ups, documents, and processing status. It allows users to plan the collection of vehicles at their location or that of customers, devoting more effort to business matters.

Car Wrecker - Caronte24.com aims to establish a Network of ATFs across the entire national territory and ensure traceability and safety of operations through

the development and dissemination of shared know-how based on innovation and environmental protection drivers.

Public Entity - Caronte24.com-seeks to be an easy and practical tool for supporting public administrations and entities. It promotes a joint effort to clear the roads of abandoned vehicles by managing and planning the removal and scrapping of ELVs scattered across the country.

C.A.R. PROJECT - COUNTERING WASTE CARS (CONTRO LE AUTO RIFIUTO)

On 23 October 2018, **Pomili Demolizioni Speciali Srl** launched a service to collect waste vehicles abandoned in the streets of Rome. In coordination and collaboration with local law enforcement, the Company managed to clear the city streets of

6,143 vehicles

(cars/trucks/vans/motorcycles/mopeds/bikes/scooters)

2018 - 2023

ROMA
CAPITALE

Backed by this experience and the process digitisation enabled by the Caronte24.com platform, the Company launched an initiative designed to flank local administrations in removing waste vehicles from public areas and protect their land. From 2022, the Company has ratified three Agreements with the Municipality.

This is how we contribute to making Rome and our land more attractive and liveable: a quick and professional service to free the city from burnt car wrecks, vandalised vehicles and scraps spoiling the beauties of Rome City Centre, the Sabina region and Ostia beaches.

WASTE MANAGEMENT

COLLECTION, TRANSPORT AND MEDIATION

Pomili Demolizioni Speciali Srl is a leading waste management company that deals with municipal and industrial waste. The Company, equipped with a vast range of vehicles of different sizes and enrolled in the National Register of Environmental Managers, is authorised to the pick-up, collection and transport of:

- non-hazardous, municipal waste;
- hazardous, municipal waste;
- non-hazardous, special waste;
- hazardous, special waste.

The services described above are performed with the greatest professionalism and care and are deployed through planned, regular, quick and accurate interventions in compliance with the reference regulations:

- Safety (Legislative Decree 81/2008 et seq.);
- Environmental (Legislative Decree 152/2006 and subsequent amendments thereto);
- Highway Code (Legislative Decree 285/1992 and subsequent amendments thereto).

TOTAL WASTE TREATED
2020 - 2023

The Company is a point of reference for private citizens, businesses, undertakings, and Entities regarding waste management and compliance with the obligations provided by the law (keeping and filling in the loading and unloading logbook, drafting and submitting the M.U.D - Environmental Declaration Form, supplying, drafting and filling in the Waste Identification Form).

Pomili Demolizioni Speciali Srl, service centre and branch office of Li. C.S.A.- Ecologia is authorised to keep loading and unloading logbooks for special waste producers with an annual production not exceeding 20 tonnes of non-hazardous waste and 4 tonnes of hazardous waste. The latter can also fulfil their obligation to keep waste loading and unloading logbooks through relevant business associations or service companies directly emanating from them.

Pomili Demolizioni Speciali Srl can:

- enter into clear, simple and transparent agreements with all customers;
- perform services tailored to the customers' needs and requests (pick-up schedule, times, days, etc.);
- carry out waste sampling and chemical and physical analysis through licensed and certified laboratories;
- provide assistance and direct environmental advice about any waste management issue;
- rent and supply its customers with validated containers/casks/tanks/dumpsters/compactors of different sizes and volumes to store the waste to be collected.

Moreover, the Company carries out waste mediation (enrolment in the National Register of Environmental Managers - Category 8) thanks to its consolidated and long-term partnership with different waste storage/recovery/disposal facilities.

BULKY MUNICIPAL WASTE COLLECTION

What is bulky waste?

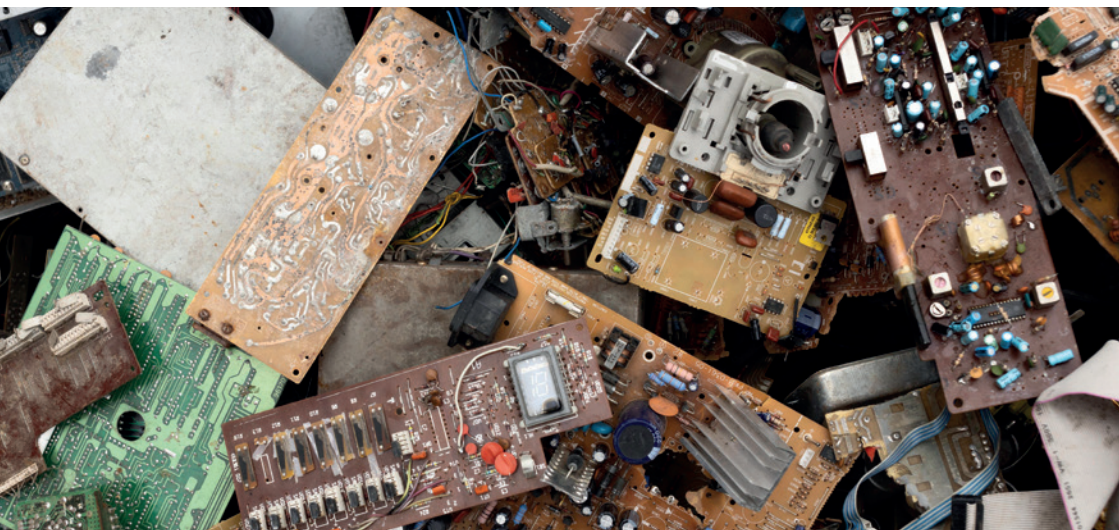

Bulky waste is large municipal waste that cannot be transported by car. Bulky items include house appliances and/or discarded furniture (fridges, tables, mattresses, etc.) and WEEE (Waste Electrical and Electronic Equipment), for which door-to-door collection is impossible due to their type or size.

Our recipients:

- door-to-door collection management for Municipalities and Public entities;
- assistance to municipal Sanitation Contracting Authorities;
- the service only applies to households;
- Individuals not equipped with an appropriate vehicle to transport the bulky waste to waste separation and recycling areas.

The service includes the following activities:

- collection of bulky waste from the roadway once the user has placed it close to their household;
- transport and delivery of the waste above to the relevant Municipal Collection Centre;
- transport and deliver the waste above to authorised recycling/disposal facilities or MRFs (multi-reuse facilities).

SCRAPPING, TREATMENT AND STORAGE
OF WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE),
FERROUS AND NON-FERROUS MATERIALS

Pomili Demolizioni Speciali Srl new waste management facility is located at 3 Via Benito Graziani, in the Municipality of Cittaducale (RI) - Santa Rufina industrial area.

The Company is authorised to treat and store the following waste:

- scrapping of waste electrical and electronic equipment (WEEE) containing hazardous substances and components as listed in Annex II of Legislative Decree 49 of 14 March 2014 which only perform storage (R13) and reuse operations;
- scrapping for recovery, recycling, reuse of waste electrical and electronic equipment (WEEE) and components, as listed in Annex II of Legislative Decree 49/2014 not containing hazardous substances;
- scrapping for the recovery, recycling and reuse of non-hazardous waste (ferrous scraps), as listed under Ministerial Decree of 5 February 1998.

ASBESTOS REMOVAL AND RECLAMATION OF CONTAMINATED SITES

Pomili Demolizioni Speciali Srl, as a Company enrolled in the National Register of Environmental Managers for 9D and 10B-C categories/classes, operates across the country and provides technical, organisational and operational assistance to address several issues of civil and industrial nature, among which:

- reclamation of contaminated sites and assets, both in use and not;
- removal, reclamation and encapsulation of ACMs in a friable or compact matrix, using specific removal and disposal products;
- compact or friable ACM confinement, covering and enclosing;
- encapsulation of compact or friable ACMs;
- reclamation of asbestos-containing sites, assets and lands;
- risk and state of preservation assessment for asbestos-cement roofing according to the General Health Management Decree 13237 of 18/11/2008 accompanied by specific definition and certification of Degradation Index (DI).

By way of example, asbestos-containing materials might include:

- | | | |
|---------------|-------------------------|-----------------------------|
| • roofing; | • smokestacks; | • glues; |
| • downpipes; | • chimneys; | • insulating panels; |
| • pipes; | • flooring; | • infill panels; |
| • tanks; | • coating; | • plasters; |
| • reservoirs; | • insulation materials; | • slabs of different kinds; |
| • containers; | • gaskets; | • etc. |

FIGURES

YEAR	WORKING SITES	ASBESTOS

*Asbestos removed in kg.

OVER THE LAST YEARS, WE REMOVED ASBESTOS FOR A QUANTITY EQUAL TO APPROXIMATELY 8 TRUCKLOADS

189,097 kg

REMOVED ACMs
2020-2023

The Company has become a reference point for Public Administrations (Municipalities, Provinces, Regions and other Entities), renowned national and international businesses, property managers and private individuals.

Our qualified and sector-experienced technicians ensure:

- the utmost transparency with competent bodies (Local Healthcare Authority - ASL, law enforcement bodies, etc.);
- paperwork handling concerning each reclamation operation as provided by law (drafting and submission of the Work Plan to the competent ASL, Notification of Commencement of Works, Notification of Completion of Works, Work Completion Report, Reclamation Certification, Waste Identification Form (F.I.R.) proving waste disposal, various communications, etc.);
- Provision of any information, suggestion and support in drafting studies and operating specifications, as well as quality, risk analysis and safety procedures.

In addition, the Company manages generated and produced waste while also ensuring traceability and monitoring over the following stages:

- classification;
- characterisation;
- ACMs sampling;
- sampling and monitoring of airborne fibres;
- qualitative/quantitative analyses and mineralometry performed in certified laboratories;
- document management;
- packing;
- transport and logistics;
- conferment to recovery facilities and/or disposal through authorised plants.

DEMOLITION OF PLANTS AND BUILDINGS

Pomili Demolizioni Speciali Srl holds one of the highest engineering, organisational and managerial qualifications to carry out demolition, dismantling and strip-out operations on buildings and plants, both in use and not, of different types:

- industrial;
- civil;
- commercial:
- road;
- naval;
- military;
- railway;
- aeronautical.

The Company - active across Italy - adopts different demolition techniques according to the surrounding environment and the type of work. More specifically, it performs:

- hot works;
- cold working;
- torch welding;
- works with self-propelled hydraulic shears, grapples, telescopic cranes, spider loaders and other specific demolition equipment;
- selective and controlled works;
- disc and diamond wire cutting operations;
- above-ground works;
- manual works.

Our multidisciplinary technicians are available to provide consultancy and information, partnerships, work specifications, quality procedures and risk and safety analyses.

In addition, the Company handles the management of the waste generated and

produced during the interventions, ensuring traceability and control over all stages of classification, characterisation, analysis, document management, transport, logistics, and start-up for recovery and/or disposal in authorised plants.

Our company's organisational efficiency stands for reliability and certainty in achieving pre-established goals while at the same time guaranteeing rapid, quality, and utterly safe intervention. In addition, the Company has state-of-the-art technology and specialised and trained technical staff capable of operating on all sites under tight deadlines. All necessary prevention and protection measures for workers and the environment are granted at every demolition stage, with all environmental restoration and reconversion operations being carried out.

The Company offers the following services:

- complete dismantling, clearing and redevelopment of large industrial areas;
- demolition of silos, tanks, chimneys, etc;
- selective dismantling, removal and emptying of interiors (furniture, furnishings, fixtures, upholstery, flooring, structures, partitions, false ceilings, masonry work, screeds, external and internal plugging, door and window frames, exposed fixtures, sanitary fixtures, various materials, etc.) involving the recovery and reuse of valuable materials and the disposal of compromised ones;
- industrial relocations, including storage services for short and long periods;
- clearance and emptying of restaurants, farmhouses and commercial premises;
- recovery, dismantling, valorisation and marketing of obsolete and non-obsolete industrial plants, equipment and machinery from divestments and/or bankruptcies;
- clearance and restoration of commercial and residential premises.
